## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 4-10 and 60-84 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for an reverse auction in which the roles of the buyer and the seller are reversed, with the primary objective to drive purchase prices downward, where the buyers find the lowest-price supplier, it does not provide enablement for direct auction formats. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4-10 and 60-84 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention

In the claims, it is not clear if the limitations first and second bidder are descriptive in name or function. That is, is the second bidder bid received after the first bidder? In the claims second information not included in the first type of information is vague and indefinite both to the nature of the content and the source of the content. The limitations of claim 83 however would overcome this rejection, provided there were a step for receiving or calling this information from a data source.

Art Unit: 3693

As to claim 84, it is not clear how the claim further limits the independent claim which seems to already include this limitation.

This Office action has an attached requirement for information under 37 CFR 1.105. A complete reply to this Office action must include a complete reply to the attached requirement for information. The time period for reply to the attached requirement coincides with the time period for reply to this Office action.

Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application.

The information is required to identify products and services embodying the disclosed subject matter of claim 1 and 60 and identify the properties of similar products and services found in the prior art.

In order for the examiner to properly consider patentability of the claimed invention under 35 U.S.C. 102(b), additional information regarding this issue is required as follows:

Please provide the trade names of any reverse auction system comprising the limitation of claims 1 and 60.

Applicant is reminded that failure to fully reply to this requirement for information will result in a holding of abandonment.

This requirement is an attachment of the enclosed Office action. A complete reply to the enclosed Office action must include a complete reply to this requirement. The time period for reply to this requirement coincides with the time period for reply to the enclosed Office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RICHARD C. WEISBERGER whose telephone number is (571)272-6753. The examiner can normally be reached on 8:30-5:00.
